RECIPE SYNC

Implementation of a Recipe Sharing Platform

Executive Summary

This project aims to develop a cloud-based Recipe Sharing Platform where users can securely create, share, and explore a wide range of culinary recipes. The system will feature intuitive publishing tools, user interaction through ratings and comments, real-time content updates, and scalable media storage, all within a fully responsive web interface. The platform is designed to foster creativity, encourage collaboration, and build a dynamic culinary community.

Key Features

- User Authentication
- Explore Recipes
- Share and Like
- Recipe Management System

Teck Stack

- Next.js
- Tailwind CSS
- MongoDB
- Javascript
